

**INSTRUCTIONS : INVISIBLE® KIT- 12V 2700K**  
**Models : LED-T12W-15-KIT**

**CAUTION:**

- Read all instructions before installing.
- Always turn off power at fuse box prior to installation to prevent electrical shock.
- Intended for indoor use. Dry and damp locations.
- For installation by a qualified electrician.
- System is intended for installation in accordance with National Electric Code, and local regulations.
- Consult with local inspector to assure compliance.

**Wiring and Installation:**

Run length	15 ft
Max Current	240 mA/ft
Max Power consumption	3.0 Watts/ft

Please refer to installation diagrams shown on page.

1. Connect to 120V supply
  - 12 Volts Portable Transformer plugs into standard 120 Volts 3 prong grounded outlet
  - Transformer must be installed away from the heat sources
2. Connect the output female connector of the transformer with the male connector of the InvisiLED tape, to form straight lines or turns around the installation surface.
3. Pro LED sections may be cut where indicated at the end of the run only.
4. On smooth surfaces, the included adhesive is sufficient in most applications. However if mounting surface is a porous or textured surface, then use a Mounting Clip to reinforce the installation.
5. Cut end caps or male end caps are the available choices for cut or uncut sections respectively.
