SLB4	SLB8	PT	WT

Ordering Example (*model number – finish*): SLB4-WT

Product Details	
Description:	Aluminum baffle used to hide Linear System ST track when used in exposed undercabinet or similar surface mount applications. May be field cut to any desired length.
Materials:	Aluminum baffle with channel to fit straight Linear System ST track and standard SLE live end connector.
System:	The SLB4 is a 4' long baffle, designed to properly conceal an ST4 and matching SLE live end. The SLB8 is a 8' long baffle, designed to properly conceal an ST8 and matching SLE live end.
Finish:	Abrasion resistant paint finish. Available in Platinum (PT) or White (WT).
Listing:	5 year W.A.C. Lighting product warranty.

Specification Features
<ul style="list-style-type: none"> The SLB baffle must be used with a remote transformer. Pre-drilled holes on the baffle allow for wiring from a live end up to a remote. Other holes may be drilled as needed. May be ordered in a platinum or white finish, and may also be field painted to match any color in an installation.
